Version control table:

Version	Date	Author	Description of changes
1.0	6/16/2026	Jephete Fenelon	Initial documentation of endpoint decommissioning request and removal process.
1.1	6/16/2026	Jephete Fenelon	Added removal verification, screenshots, and post-removal validation.

Purpose

This document records the decommissioning and removal of the **Tytle 2 Windows** endpoint from the Action1 Endpoint Management Platform following confirmation that the device was no longer in service.

The purpose of this activity was to maintain an accurate endpoint inventory, improve asset governance, optimize endpoint management resources, and ensure that only active and supported devices remain enrolled within the endpoint management environment.

Scope

This activity included:

- Verification of endpoint status
 - Confirmation of device decommissioning
 - Removal of the endpoint from Action1
 - Validation of successful removal
 - Documentation for audit and record-keeping purposes
-

Endpoint Details

Property	Value
Endpoint Name	Tytle 2 Windows
Assigned User	Isaac Jordan
Device Role	Printer Controller
Endpoint Group	Philip Augustine
Operating System	Windows 10 (22H2)
Status Before Removal	Disconnected
Critical Vulnerabilities	62
Non-Critical Vulnerabilities	609
Critical Missing Updates	2
Non-Critical Missing Updates	4

Background

A request was received to remove the **Tytle 2 Windows** endpoint from Action1 following confirmation that the device had been decommissioned.

The endpoint remained listed within the managed inventory despite no longer being in active service. Removal was required to maintain accurate endpoint records and ensure that endpoint management resources remain allocated to active devices.

Removal Procedure

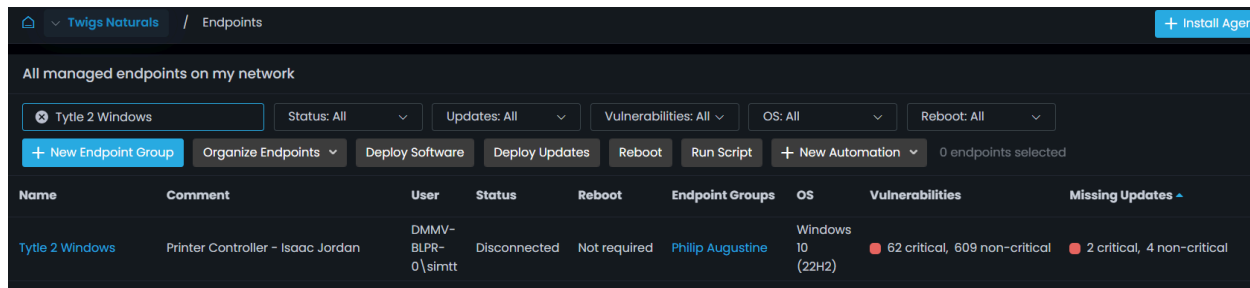

The following actions were performed:

1. Logged into the Action1 Endpoint Management Platform.
2. Navigated to the **Endpoints** section.
3. Searched for **Tytle 2 Windows** within the endpoint inventory.
4. Verified endpoint ownership, status, and device purpose.
5. Confirmed that the device had been decommissioned.
6. Selected the endpoint from the inventory.
7. Opened the endpoint management menu.
8. Selected **Remove from Action1**.
9. Reviewed the removal confirmation prompt.
10. Confirmed endpoint removal.
11. Monitored removal progress.
12. Performed post-removal verification by searching for the endpoint.
13. Confirmed that no entries remained in the inventory.

Evidence and Screenshots

Figure 1. Endpoint Identification Prior to Removal

Insert screenshot showing **Tytle 2 Windows** within the Action1 inventory.

The screenshot displays the Action1 Endpoint Management Platform interface. At the top, the breadcrumb navigation shows 'Twigs Naturals' and 'Endpoints'. A search bar contains 'Tytle 2 Windows'. Below the search bar, there are filters for Status, Updates, Vulnerabilities, OS, and Reboot. A row of action buttons includes '+ New Endpoint Group', 'Organize Endpoints', 'Deploy Software', 'Deploy Updates', 'Reboot', 'Run Script', and '+ New Automation'. The main table lists managed endpoints. The first entry is 'Tytle 2 Windows', with a comment 'Printer Controller - Isaac Jordan', user 'DMMV-BLPR-0\simtt', status 'Disconnected', and reboot status 'Not required'. It is assigned to the 'Philip Augustine' endpoint group, running Windows 10 (22H2). The vulnerabilities section shows 62 critical and 609 non-critical vulnerabilities, while the missing updates section shows 2 critical and 4 non-critical updates.

Name	Comment	User	Status	Reboot	Endpoint Groups	OS	Vulnerabilities	Missing Updates
Tytle 2 Windows	Printer Controller - Isaac Jordan	DMMV-BLPR-0\simtt	Disconnected	Not required	Philip Augustine	Windows 10 (22H2)	62 critical, 609 non-critical	2 critical, 4 non-critical

Figure 2. Endpoint Selected for Removal

Insert screenshot showing the endpoint selected and the **Remove from Action1** option.

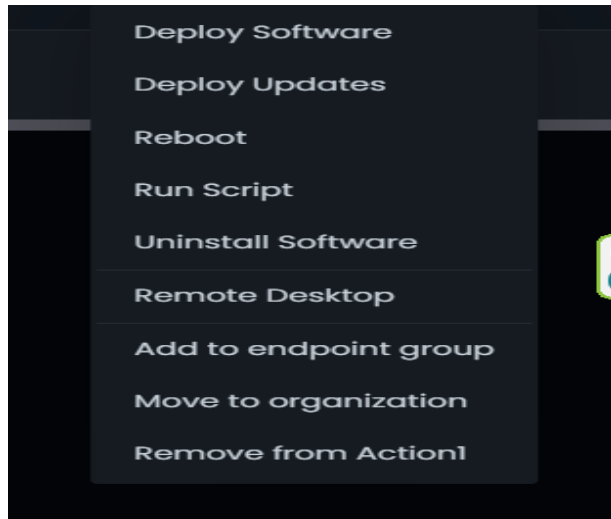

Figure 3. Removal Confirmation Window

Insert screenshot showing the Action1 confirmation prompt prior to endpoint removal.

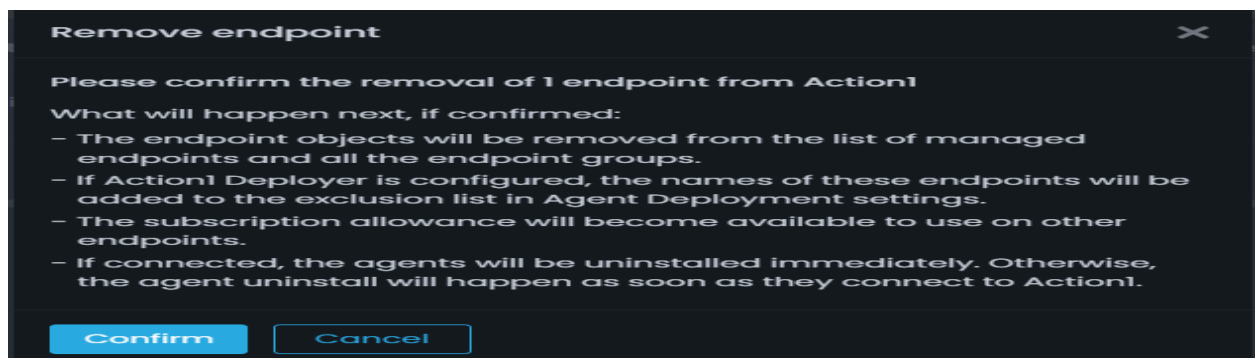

Figure 4. Endpoint Removal in Progress

Insert screenshot showing the endpoint removal progress bar.

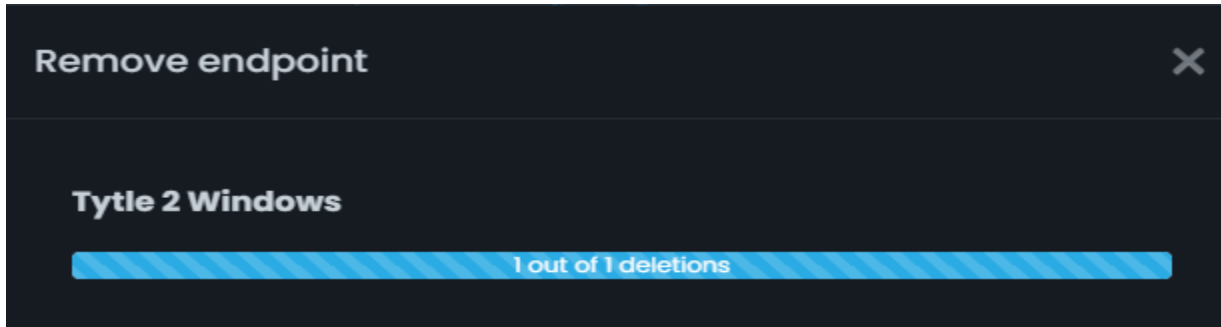

Figure 5. Successful Removal Confirmation

Insert screenshot displaying the message:

"1 endpoint has been removed successfully."

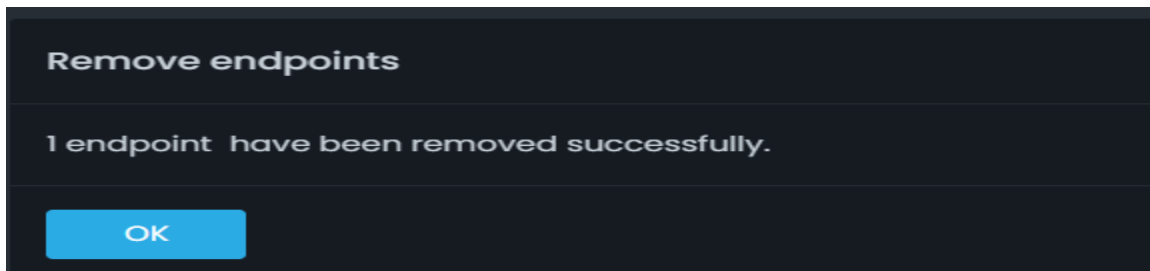

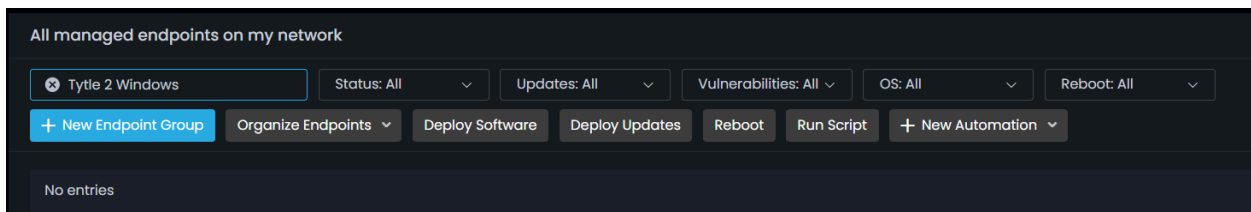

Figure 6. Post-Removal Verification

Insert screenshot showing that searching for **Tytle 2 Windows** returns **"No entries."**

Results

The endpoint was successfully removed from Action1 and no longer appears within the managed inventory.

Removal from endpoint groups and management records was completed successfully. The endpoint license allocation became available for future endpoint enrollment.

Post-Removal Validation

Validation activities included:

- Verification that the endpoint no longer appears in Action1.
- Confirmation that the endpoint was removed from associated endpoint groups.
- Confirmation that endpoint inventory accurately reflects active devices.

The removal process completed without errors.

Operational Considerations

The following considerations support effective endpoint lifecycle management and inventory accuracy:

- Regular review of endpoint inventories helps ensure that only active devices remain enrolled.
- Timely removal of decommissioned devices reduces management overhead.
- Verification procedures prior to removal help prevent accidental deletion of active endpoints.
- Accurate documentation supports audit readiness and strengthens asset governance.

Future Considerations

This document is maintained as a living record and may be updated to reflect:

- Endpoint re-enrollment activities
 - Changes to device status
 - Asset lifecycle updates
 - Audit observations and inventory reviews
-

Final Summary

On June 16, 2026, the **Tytle 2 Windows** endpoint was successfully removed from the Action1 Endpoint Management Platform following confirmation that the device had been decommissioned.

Post-removal verification confirmed that the endpoint no longer exists within the managed inventory, supporting accurate asset management, improved inventory accuracy, and effective endpoint lifecycle governance.

Final Status: Completed Successfully
