

DaVinci Resolve Troubleshooting Documentation

Incident Information

Field	Value
Application	DaVinci Resolve
Version	20.3.30010
Date Investigated	05/30/2026
Investigator	Jephete Fenelon
Environment	Remote workstation accessed through Action1
Issue Type	Application Launch Failure

Problem Description

When attempting to launch DaVinci Resolve, the application failed to start and displayed the following error:

Resolve.exe – Entry Point Not Found

The procedure entry point `iCreateProgramWithIL` could not be located in the dynamic link library:

`C:\Program Files\Blackmagic Design\DaVinci
Resolve\PoResRAW.dll`

Troubleshooting Steps Performed

Step 1 – Verify Endpoint Connectivity

Actions

- Connected to the endpoint using Action1 Remote Access.
- Confirmed the device was online and reachable.
- Verified remote session functionality.

Result

 Endpoint successfully connected.

Step 2 – Verify Application Files

Actions

Navigated to:

C:\Program Files\Blackmagic Design\DaVinci Resolve\

Verified existence of:

- Resolve.exe
- PoResRAW.dll

Result

 Required application files were present.

Step 3 – Verify DLL Information

Actions

Opened:

PoResRAW.dll → Properties → Details

Findings

Observed:

- File Version = Blank
- Product Version = Blank

Result

 Suspected corrupted or mismatched DLL version.

Step 4 – Verify Resolve Version

Actions

Opened:

[Resolve.exe](#) → [Properties](#) → [Details](#)

Findings

Property	Value
Product Name	DaVinci Resolve
Version	20.3.3.10
Date Modified	05/19/2026

Result

 Executable version confirmed.

Step 5 – Check Installed Programs

Actions

Opened:

Control Panel → Programs and Features

Located:

- DaVinci Resolve
- DaVinci Resolve Control Panels

Findings

Software	Version
DaVinci Resolve	20.3.3001 0
Control Panels	2.3.4.0

Result

✓ Installed components identified successfully.

Step 6 – Attempt Application Repair

Actions

Selected:

DaVinci Resolve → Repair

Result

Repair failed.

Windows Installer displayed the following error:

“The feature you are trying to use is on a network resource that is unavailable.”

Step 7 – Investigate Installer Failure

Findings

Windows attempted to locate:

`C:\Users\simtt\AppData\Local\Temp\7zSC2012264\ResolveInstaller.msi`

The file could not be found.

Result

 Original installer package missing.

Step 8 – Search for Original Installer

Actions

Open Downloads folder.

Located:

`DaVinci_Resolve_20.3.3_Windows.zip`

Size:

- Approximately 2.79 GB

Result

 Original installation package located.

Step 9 – Begin Installer Extraction

Actions

Selected:

- Extract All

Extraction path:

C:\Users\simtt\Downloads\DaVinci_Resolve_20.3.3_Windows

Status

 Extraction initiated successfully.

Step 10 – Resolve Existing Installation Conflict

Issue Encountered

Installer displayed:

“A newer version of Resolve is already installed. Please uninstall it in Control Panel first.”

Actions

Opened:

Control Panel → Programs and Features

Uninstalled:

- DaVinci Resolve

Result

 Previous installation removed successfully.

Step 11 – Reinstall DaVinci Resolve

Actions

- Relaunched installer using:
 - Right-click → Run as administrator
- Accepted license agreement
- Used default installation directory
- Proceeded through setup wizard

Result

✓ Installation completed successfully.

Step 12 – Runtime DLL Error Encountered

Error Message

“The procedure entry point could not be located in the dynamic link library ProResRAW.dll”

Actions Performed

- Located ProResRAW.dll
- Renamed DLL temporarily for testing
- Relaunched DaVinci Resolve

Result

⚠ Additional runtime dependency issues detected.

Step 13 – Secondary DLL Error

Error Message

“The code execution cannot proceed because ProResRAW.dll was not found.”

Findings

Confirmed that:

- DLL file was either corrupted or improperly registered
- DaVinci Resolve could not properly load the component

Result

 Clean remediation required.

Step 14 – Remove Remaining Blackmagic Components

Actions

Opened:

Control Panel → Programs and Features

Removed:

- DaVinci Resolve Control Panels
- Fairlight Audio Accelerator Utility

Result

 Remaining Blackmagic components removed successfully.

Step 15 – System Restart

Actions

- Restarted workstation to finalize uninstall operations and release locked components.

Result

 Restart completed successfully.

Step 16 – Perform Clean Reinstallation

Actions

- Relaunched installer using:
 - Right-click → Run as administrator
- Reinstalled DaVinci Resolve
- Installed Blackmagic RAW Player component
- Left Fairlight utility unchecked during reinstall

Result

✓ Clean reinstall completed successfully.

Step 17 – Verify DLL Presence

Actions

Navigated to:

C:\Program Files\Blackmagic Design\DaVinci Resolve\

Verified:

- ProResRAW.dll

Findings

The DLL file now exists again after reinstalling.

Result

✓ DLL restored to application directory.

Step 18 – Install Microsoft Visual C++ Runtime

Purpose

Suspected missing or corrupted Visual C++ runtime dependency causing DLL loading failure.

Actions

Downloaded and installed:

- Microsoft Visual C++ 2010 x64 Redistributable

Installation included:

- Runtime libraries with Service Pack 1

Result

 Runtime installation completed successfully.

Step 19 – Install Dedicated Blackmagic RAW Package

Actions

Downloaded and installed:

- Blackmagic RAW 5.1 for Windows

Installation source:

- Official Blackmagic Design download portal

Performed:

- ZIP extraction
- Installer execution
- License agreement acceptance
- Default installation procedure
- System restart after installation

Result

 Blackmagic RAW package installed successfully.

Step 20 – Final Application Launch Test

Actions

Attempted to launch:

- DaVinci Resolve

Error Encountered

“The code execution cannot proceed because ProResRAW.dll was not found. Reinstalling the program may fix this problem.”

Findings

Confirmed:

- ProResRAW.dll exists in:
C:\Program Files\Blackmagic Design\DaVinci Resolve\
- Blackmagic RAW package installed successfully
- Microsoft Visual C++ runtime installed successfully
- Multiple clean reinstalls performed
- Multiple controlled system restarts completed

Final Result

✗ Application launch failure persists despite full remediation attempts.

Root Cause Analysis

Most likely contributing causes:

- Corrupted or incompatible ProResRAW.dll
- Missing ResolveInstaller.msi
- Failed or incomplete update/repair process
- Residual Blackmagic components causing dependency conflicts

- Missing or damaged Microsoft Visual C++ runtime libraries
 - Possible GPU/runtime incompatibility
-

Remediation Performed

- Verified endpoint connectivity using Action1.
 - Investigated corrupted DLL behavior.
 - Attempted repair installation.
 - Located original installer package.
 - Removed previous Resolve installation.
 - Performed clean reinstall using administrator privileges.
 - Removed residual Blackmagic utility components.
 - Reinstalled Blackmagic RAW Player.
 - Installed Microsoft Visual C++ Redistributable runtime package.
 - Installed dedicated Blackmagic RAW codec package.
 - Performed multiple controlled system restarts.
 - Verified DLL presence and application dependencies.
-

Final Assessment

The issue appears to be caused by one or more of the following:

- Corrupted or incompatible codec dependency
 - Unsupported or damaged runtime environment
 - GPU/runtime incompatibility
 - Operating system dependency conflict
 - Incomplete codec registration at the system level
-

Escalation Recommendation

Recommended next actions:

1. Escalate to Tier 2 / Systems Engineering.
 2. Verify GPU driver compatibility with DaVinci Resolve 20.3.3.
 3. Perform full removal of all Blackmagic components using vendor cleanup procedures.
 4. Test installation under a clean Windows user profile.
 5. Reinstall or update supported GPU drivers.
 6. Consider OS-level remediation if dependency corruption is suspected.
-

Final Status

Item	Status
Endpoint Connectivity	✓ Successful
Installer Recovery	✓ Successful
Clean Reinstallation	✓ Successful
Blackmagic RAW Installation	✓ Successful
Runtime Installation	✓ Successful
DLL Presence Verified	✓ Successful
Application Launch	✗ Failed
Escalation Required	✓ Recommended

Skills Demonstrated

- Remote endpoint troubleshooting
- Windows application remediation
- DLL troubleshooting
- MSI installer investigation
- Runtime dependency analysis

- Software uninstall/reinstall procedures
- Administrative installation practices
- Root cause analysis
- Action1 remote administration
- Windows Control Panel troubleshooting
- Codec/runtime dependency remediation
- Escalation documentation and incident reporting

Step 21 – Blackmagic Design Registration Verification

Actions

Accessed the official Blackmagic Design software download portal to obtain:

- Blackmagic RAW 5.1 for Windows

Completed required registration fields including:

- First Name
- Last Name
- Email Address
- Country
- Basic product usage information

Accepted:

- Blackmagic Design License Agreement

Result

- ✓ Registration completed successfully.
- ✓ Download access granted successfully.

Additional Notes

The Blackmagic RAW package was downloaded directly from the official Blackmagic Design website and installed successfully as part of codec/runtime remediation efforts related to the [ProResRAW.d11](#) launch failure.

Additional Endpoint Information

Action1 Console Verification

During troubleshooting, the endpoint was verified through the Action1 management console.

Observations

- Endpoint status:
 - Connected
- Operating System:
 - Windows 10 (22H2)
- Assigned endpoint/user information verified successfully.
- Remote management access through Action1 functioned correctly throughout the troubleshooting session.
- Device vulnerability indicators were visible within the Action1 dashboard during investigation.
